Table

A simple lamp placed atop a table could become so aesthetically pleasing and add so much personality to your space. Table lamps come with different shades defining the whole vibe.

MOORGEN SMART TABLE LAMP

Cristal accomplice lighting for intimate moments. Our Cristal is a wireless lamp small in size portable, designed to be used as a centerpiece to create an intimate atmosphere.All the beauty of Cristal is condensed in this collection serving as a lighting support, to foster proximity and closeness suitable for the special occasion you intend to illuminate. Soft like canale light amazing as it seems meanwhile not conspicuous.

Jorge Herrera

Jorge Herrera is an internationally renowned interior designer and product designer, the founder of Herrera Design Studio as well as a visiting professor at the Istituto Europeo di Design (IED) in Madrid and Escola d'Art i Superior de Disseny d'Alacant(EASD – abbrev. in Spanish lang) in Valencia. He has received numerous awards such as the Red Dot Award, the IDEA International Design Excellent Award Good Design Award, and the IDEA International Design Creative Award.

Steve Leung , BBS

Founder of Steve Leung Design Group,Honoured with The Andrew Martin International Interior Designer of the Year Award (2015),First Chinese President of the International Federation of Interior Architects\Designers (IFI) (2017 - 2020),Awarded Bronze Bauhinia Star (BBS) by the Government of HKSAR,Executive Director of Design Committee of China National Interior Decoration Association (CIDA),Founding Committee of C Foundation Vice Chairman of the Board of Directors of Hong Kong Design Centre.

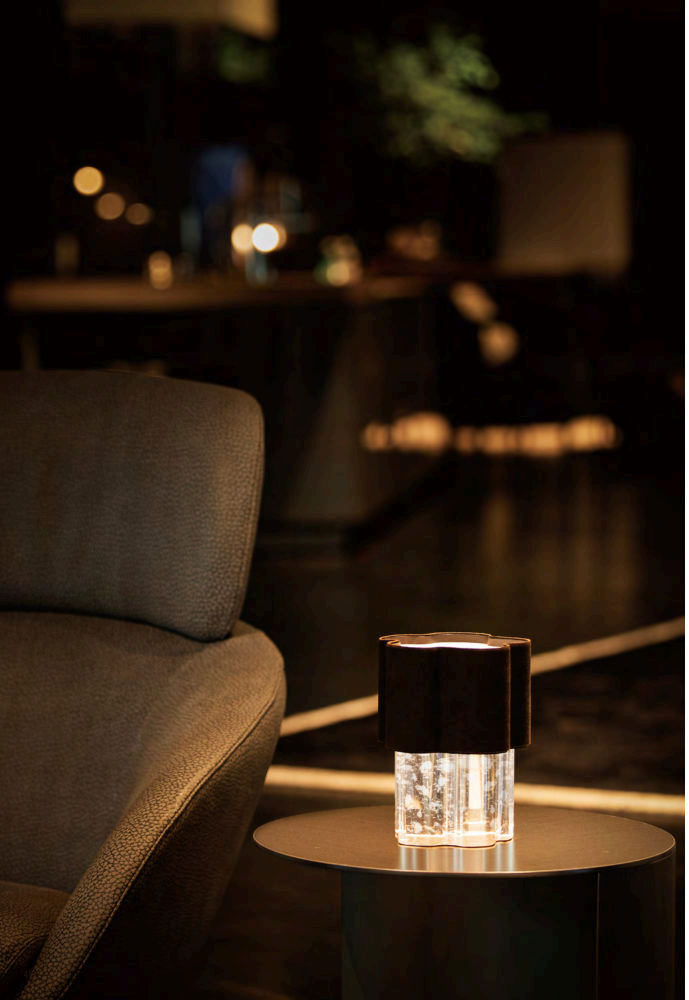

Andrea Bonini , BBS

Founder and Creative Director of Andrea Bonini Studio,Named as one of the "Future Seven Designers" by Architectural Digest Italia.

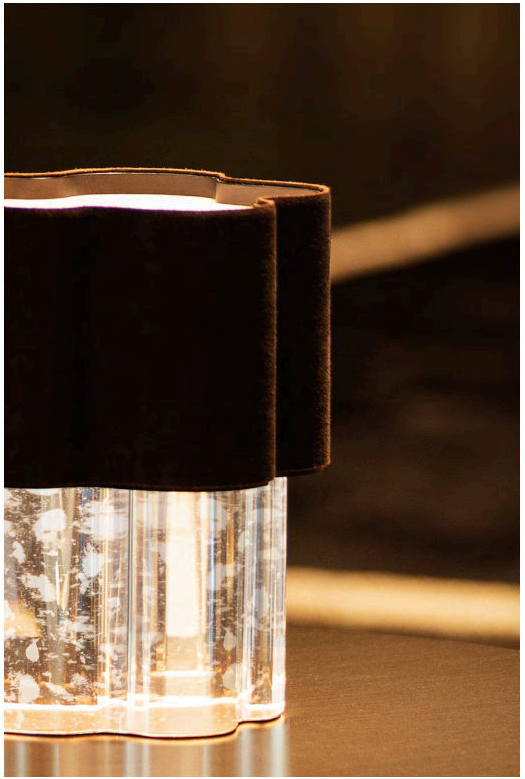

The creation of Lumia is driven by the pursuit of capturing inspiration: the sunset over the hills of Italy, where the after glow wanders through the winding mountains, dynamically changing with the variations of sunlight. Steve and I were both inspired by urban skylines and Italian architecture, hoping to blend each other's personality traits. He has more of an urban vibe, while I lean towards Italian style. At home, we use materials we have on hand, such as leather and glass. We collaborated with the Moorgen to incorporate non-contact sensing technology into this design, allowing for gesture control of the light intensity without the need to touch the fixture.

This design is completely transparent,and I imagine it blending seamlessly into any environment as it essentially disappears into the background.However it can gently light up and dim down, giving the impression of something that breathes and feels alive.I often think about buildings in our cities—these buildings can sometimes feel cold and detached, creating a sense of distance from people.But if it also has life,it is part of nature,allowing for such a possibility of interaction with it.Our cities could then become warm and emotional spaces rather than being dominated by cold,impersonal designs.

METAL SERIES

moorgen × JU BIN

Solitude Series draws inspiration from the classic kerosene lantern, reimagining its iconic form and function with a contemporary, minimalist approach. This portable smart light simplifies tradition into elegance—its two-tiered shades, one large and one small, evoke the quiet silhouette of a cloaked fisherman braving the snow. The soft gleam of matte silver metal adds a wintry chill, like moonlight on frozen water.In this subtle interplay between modern design and ancient verse, imagination becomes the bridge—linking the light in your hand to the timeless image of a lone figure fishing in the snow.

Fluid simplicity hypnotism and creative surprise. Inspired by the hypnotic movements of broken, mercury drops from a thermometer in the flattened shape that those drops become, due to their weight and thinking about the imaginary threads, that they would draw in their path the Fluid collection generated a creative surprise as you know by connecting the drops with the small tubes that distribute the light elegant and discreet.

Neri&Hu was given a brief to design a light that is both sculptural and practical. This product was inspired by the traditional lectern, which features a slanted wooden plane used as a platform for liturgical books or musical scores. Neri&Hu crafted stone profiles in two different shapes to serve as supports for important reading documents, as well as bases for lighting attachments. The light element can be positioned in various ways within the holder using a hook attachment. Different lighting effects for various scenarios can be created through the interaction between the light and stone profile.

Steve Leung , BBS

Founder of Steve Leung Design Group,Honoured with The Andrew Martin International Interior Designer of the Year Award (2015),First Chinese President of the International Federation of Interior Architects\Designers (IFI) (2017 - 2020),Awarded Bronze Bauhinia Star (BBS) by the Government of HKSAR,Executive Director of Design Committee of China National Interior Decoration Association (CIDA),Founding Committee of C Foundation Vice Chairman of the Board of Directors of Hong Kong Design Centre.

Andrea Bonini , BBS

Founder and Creative Director of Andrea Bonini Studio,Named as one of the "Future Seven Designers" by Architectural Digest Italia.

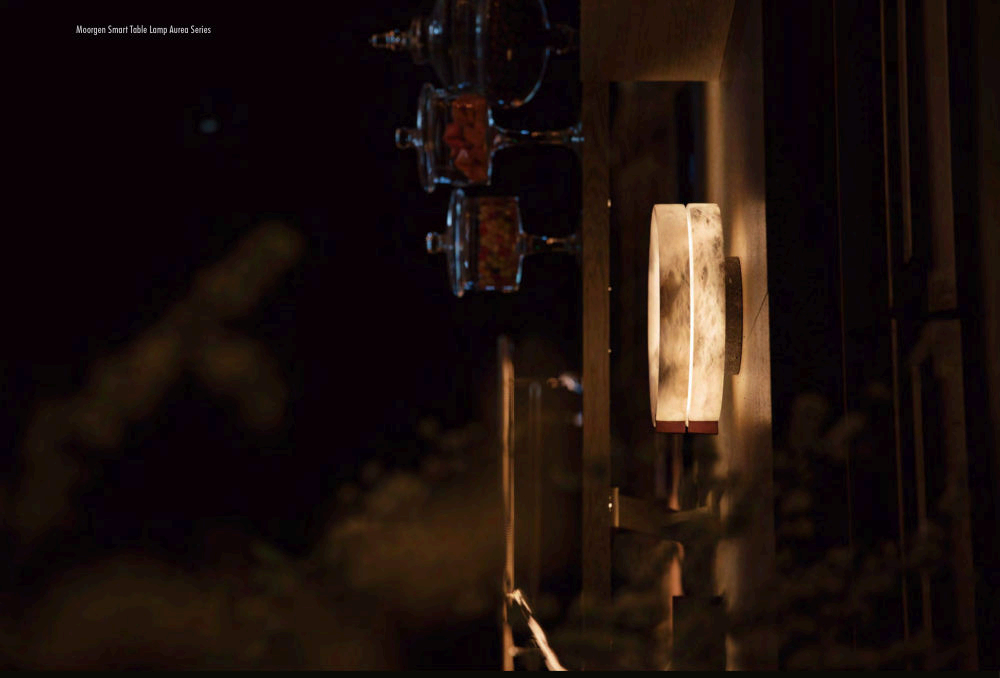

The AUREA stems from the enjoyment and reflection that Steve and I found in the laws of nature.
Taking the golden ratio as an example, we want to create a purely archetypal creation.
Inspired by classical architecture, it is a delicate and elegant design that can blend into indoor environments. The stacked double loops pay tribute to the fullness of the circle, with light and shadow seemingly suspended in mid-air, hazy and enchanting.
With the collaboration of the Moorgen, this design introduces a mechanically driven manual control for lighting, tightly connecting humans with the digital world. The small leather handle provides users with a unique tactile experience and allows for the adjustment of light.

Model	D157
Material	Glass
Color	Frosted Opal + Beige Alabaster
CT	2700K
Ra	≥90
S	Φ230x312mm
M	Φ300x407mm

- An intimate bedside lamp, designed to create a soft and inviting atmosphere.
- Beneath the glass sphere lies a base of Spanish natural alabaster, a rare stone formed over hundreds of millions of years.
- Both the sphere and the alabaster base can be dimmed together or independently.
- A subtle contrast—when the sphere glows softly while the alabaster shines brighter—creates a refined visual effect.
- The triple-layer glass sphere diffuses light with exceptional softness.
- A custom star-structured light source ensures even, radiant illumination across the entire globe.

Model	D77
Material	Glass + Metal
Color	Matte White + Antique Black Base
CT	2700K
Ra	≧90
Dimension	Φ230mm+207×197×77mm

- The base of the Clove Series is very well-designed
- The Clove Series with a base is less likely to roll and is more suitable for placing on a bedside table or side table
- The Clove Series can bring a soft ambient light to the entire space
- The 90 Ra has higher color rendering accuracy than that of 80 in the same kind of products
- The three-layer glass sphere makes the light softer

A beam of light falls, awakening the silent night and casting a faint light in the lonely forest. The "Floating Series" floor lamp, made up of stainless steel mirror rods, is like this falling beam of light, blending with the environment to create a beautiful and poetic space. The mirrored lamp body stitches together scenes from different angles, just like an unreal mirage

The light breaks out of the stone as it is sliced by a cold metal profile, a mix of slim beam and metallic reflections. As if moon shines in the dark over the water and mountains. Nature and industry have long been viewed as opposing forces, however, these two striking forces reaches balance from this visual art. "Clear Shadow " is inclined to convey both conflict and harmony

BLACK AMBER SERIES

Model	L57
Material	Metal
Color	Antique Black
CT	2700K
Ra	≧90
M	145×140×1000mm
L	145×140×1200mm

- The black amber series is simply a luminous soft decoration
- During the daytime, a tall and a short candlestick are just a floor ornament
- The light strip behind the candlestick at night will wash the wall bright emitting a soft ambient light source
- At night, the series is a good option for low to medium level lighting

MADELINE SERIES

Model	L22
Material	Metal
Color	Vintage Grey
CT	2700K
Ra	≧90
Dimension	200×115×1220mm

- The Madeline series is a compact and versatile floor lamp with a strip light
- When placing the series next to a painting, the direction of the light can be adjusted to illuminate the painting
- The series can also be used to illuminate the walls or ceilings to create a soft ambient light in the space
- Madeline's biggest feature is the practicality that the luminous rod can adjust the lighting angle well
- The series placed next to desks can usually illuminate the side of the desk and adjust the light pole to illuminate the desktop when writing

CHENIN BLANC SERIES

Model	L86
Material	High-Transparency Glass Tube
Color	White
CT	2700K
Ra	≧90
Dimension	615×425×1800mm

- For optimal use, the lampshade is designed to tilt slightly upward.
- Equipped with a motorized spotlight, the lamp can be remotely controlled to tilt, rotate, adjust focus, and dim with ease.
- When projected onto the wall or ceiling, the spotlight transforms into a soft, expansive wash of light, creating a soothing atmosphere.
- The interplay of crystal glass stand and natural wool lampshade delivers a harmonious balance of transparency and texture.

THE STAR OF SOUTH AFRICA **SERIES**

Wall

Different shaped wall lamps can create different types of wall shadows, giving the space additional layers of texture. Wall lights work alongside with ceiling lights, providing supplementary illumination to the added benefit of alleviating glare.

MOORGEN SMART ACCENT WALL LAMP

In the word "Zhizai", the character "Zhi" itself possesses a sense of geometric structure and embodies the meaning of positioning an object. As a verb, it emphasizes the action and decision of placing an object in a specific location, thereby activating and defining space. If used as an adjective, the word expresses a state of tranquility and adaptation, as if all things are in their rightful place, existing harmoniously and freely. If understood as a noun, it ascends to a philosophical exploration. The intentional placement involves contemplation over existence and position. Whether it is placing objects or stones, it carries a conscious motive for spatial creation, not only managing physical space but also merging inner order with external imagery.

Wu Bin

Famous designer and curator,founder of W.DESIGN,andrew martin International Interior design award,first winner of the global annual award,in mainland china.

MOORGEN SMART AMBIENT WALL LAMP
BARCADI SERIES

Model	K1
Material	Alabaster
Color	Silver, Gold, Antique Grey
CT	2700K
Ra	≧97
Dimension	190×42×153mm

- The Barcadi Series uses alabaster
- The series can bring a soft ambient
- light source to the entire space
- Some designers place the lamp at the waist as mid-level lighting
- Homeowners can customize their favorite luminous alabaster according to the design style
- The metal buckles are available in three colors: gold, silver, and dark brown

BARCADI **SERIES**

MOORGEN SMART AMBIENT WALL LAMP
STILTON SERIES

Model	K5
Material	Alabaster + Metal
Color	Antique Black \ Vintage Brown
CT	2700K
Ra	≧92
S	35×70×600mm
M	35×70×1200mm

- There is a thick alabaster inside the Stilton Series lamp
- Therefore, the stone patterns have a beautiful sense of depth
- The Stilton Series is a versatile wall lampespecially the 1.2-meter version
- All of Moorgen wall lamps are dimmable
- The standard comes with a two-button dimming remote control

Moorgen Smart Ambient Wall Lamp ≤Stilton Series

STILTON **SERIES**

STILTON **SERIES**

In the word "Zhizai", the character "Zhi" itself possesses a sense of geometric structure and embodies the meaning of positioning an object. As a verb, it emphasizes the action and decision of placing an object in a specific location, thereby activating and defining space. If used as an adjective, the word expresses a state of tranquility and adaptation, as if all things are in their rightful place, existing harmoniously and freely. If understood as a noun, it ascends to a philosophical exploration. The intentional placement involves contemplation over existence and position. Whether it is placing objects or stones, it carries a conscious motive for spatial creation, not only managing physical space but also merging inner order with external imagery.

ZHIZAI-1 SERIES

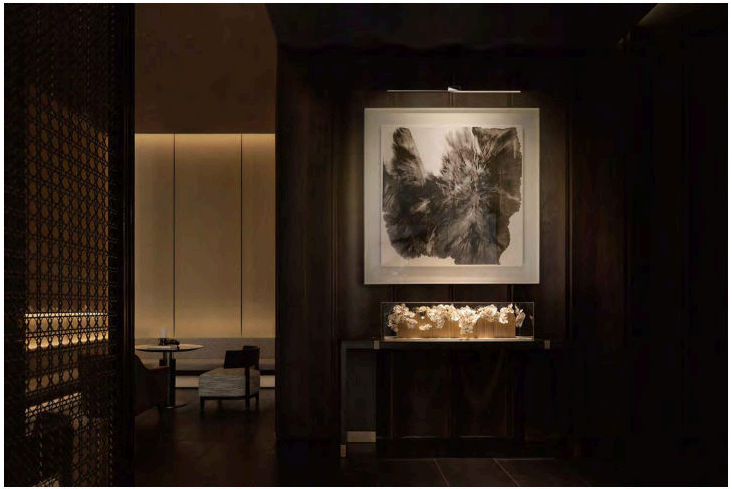

MOORGEN SMART ART ACCENT WALL LAMP
TUX SERIES

Model	K19
Material	Metal
Color	Glossy Silver \ Vintage Black
CT	2700K
Ra	≧95
Dimension	780×150×10mm

- The Tux Series Art Accent Wall Lamp offers a timeless and traditional way to
- illuminate artwork.
- Its minimalist design makes it a perfect fit for contemporary and modern interiors.
- Ultra-slim wall brackets require pre-embedded openings for installation.
- The style of the lamp is designed to complement both the artwork and its frame.
- Color finishes can be fully customized to the client's preference.

TUX SERIES

Moongem Smart Accent Wall Lamp Tux Series

MOORGEN SMART ACCENT WALL LAMP
TUBEROSE SERIES

Model	K2
Material	Metal
Color	White \ Black
CT	2700K
Ra	≧95
S	600×90×28mm
M	1200×90×28mm

- The light and shadow of the Tuberose Series can fully release the texture of the wall
- It is no longer popular from the perspective of lighting design to use spotlights on the wall to increase wall brightness
- As the saying goes, when the walls are bright the space is bright, so it is important to clean and polish the walls
- Fewer spotlights can be installed on the top making the ceiling cleaner
- The series emits light from both top and bottom and can be dimmed separately

CONQUISTADOR SERIES

Model	K23
Material	High-Transparency Glass
CT	2700K
Ra	≧90
Dimension	330×66×150mm

- The Conquistador series is a wall lamp placed at the waist
- It is a special type of ambient lighting
- Similarly, a beautiful light and shadow can also be created on the wall area around the waist
- You can use Moorgen remote control to dim the lights
- The series is suitable for installation on the side of a wide doorway

CONQUISTADOR **SERIES**

MOORGEN SMART OUTDOOR LAMP

Gardens, patios, terraces, facades; whatever the surface you have to light up, you will need a precise lighting element. On Moorgen you can choose from a vast array of design outdoor lamps to suit all needs. From garden lamp posts to outdoor pendant lamps, from floodlights for architecture, to underwater lamps for pools and fountains.

Outdoor

A beam of light falls, awakening the silent night and casting a faint light in the lonely forest. The "Floating Series" floor lamp, made up of stainless steel mirror rods, is like this falling beam of light, blending with the environment to create a beautiful and poetic space. The mirrored lamp body stitches together scenes from different angles, just like an unreal mirage.

DEFENSE SERIES

Model	X2
Material	Glass
Color	Silver
CT	2700K
Ra	≧90
Dimension	300×170×110mm
Ingress Protection	IP66

- The Defense series is two outdoor waterproof spotlights shining up on the leaves
- At the same time, the silver surface of the guard plate can blend better into the garden environment
- When you sit in the garden, the series can illuminate the entire grove
- Many Defense outdoor lights give a feeling of seeing light but not the lamp
- It is because the silver surface has completely blended into the green garden environment

Ma Yansong Master Collaboration
Sublime Series

The Moorgen motorized track lights
and motorized spotlights of the series were designed
by the famous Chinese architect Ma Yansong and
they have launched the Moorgen × Ma Yansong collaborative collection

The motorized track light can not only move horizontally
but can also be installed and moved at an angle on the track
and it can even be installed at a 90-degree angle on the wall
The spotlight can also move vertically

moorgen × MA YANSONG

Moorgen Motorized Spotlight Round - Zoom - Magnetic Track

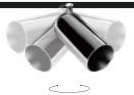

10-40 degree of focus range

Move left and right

Swing adjustment within vertical 90 degrees

Rotation adjustment within 355 degree

Ma Yansong

International renowned architect
Co-founder of MAD Architects
Fellow of the Royal Institute of British Architects
2014 World Young Leaders
TIME 100: the Most Influential People of 2025
Curator, China Pavilion, La Biennale di Venezia 2025

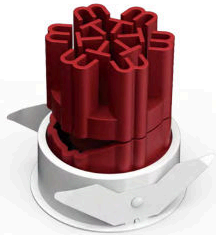

Move down and up through electric power

Internationally Acclaimed Lighting Designer
Founder and Principal Consultant of TinoKwan Lighting Consultants Ltd.
Kwan's lighting design works span luxury hotels and premium commercial spaces around the world

moorgen x TINOKWAN

Tino Kwan Master Collaboration
Cloud 9 Series

As a renowned master of lighting design in Asia, Mr. Tino Kwan has worked on numerous landmark projects worldwide. This time, Mr. Tino Kwan has designed round spotlights specically for villas and large flat at clients for Moorgen and defined it as the Moorgen & Tino Kwan Master Collaboration round spotlight
The biggest feature of this spotlight is its extremely high color rendering. Many exquisite furniture and fabrics in the home need to be illuminated by a spotlight with high color rendering in order to highlight the texture of every detail in the space with high-quality lighting. Therefore, a truly full-spectrum spotlight has become the first choice for this light. The spotlights with 97 Ra has a larger color gamut and higher color rendering accuracy than regular 97 Ra spotlights. It can accurately reproduce rich and delicate colors without any distortion, providing a performance closer to natural light
Mr. Tino Kwan has chosen the world's top LED full spectrum light source chip which presents a light color performance of "golden, soft, and transparent"
In terms of product appearance, Mr. Tino Kwan still chose the theme color red of Tino Kwan Lighting Design Company as always

We link the reality life space with Smart Home to suit personalized lifestyle, exploring the convenient, homelike, effective and free space demand and endowing the incredible creativity and happiness
